Recognizing the importance of cybersecurity, President Obama designated October as National Cyber Security Awareness Month (NCSAM). NCSAM is designed to engage and educate public and private sector partners through events and initiatives with the goal of raising awareness about cybersecurity and increasing the resiliency of the nation in the event of a cyber incident. October 2014 marks the 11TH annual National Cyber Security Awareness Month sponsored by the Department of Homeland Security in cooperation with the National Cyber Security Alliance (NCSA) and the Multi-State Information Sharing and Analysis Center (MS-ISAC).
